

## Stewardship Site Assessment: McCoy Farm

### Project Summary:

FES were recently appointed by Mr McCoy owner of Farm 612/0, Kasteelberg, Swartland Municipality, to assist with the establishment of a reactive stewardship site on the property. This due to the fact that the site was recognised as having important biodiversity features within its extent. Additionally because it unfortunately falls outside of the current stewardship priority areas identified within the Stewardship Programme.

FOOTPRINT's task was to assess the suitability of the property as a potential reactive Stewardship Site, in particular to:

1. Undertake a Site Visit and Stewardship Site Assessment of De Hoop.
2. Provide recommendations in terms of the development & conservation proposals for the property.

### Client:

Mr. McCoy of Farm 612/0, Kasteelberg, Swartland Municipality
